

Bonneville Belly Pan £99

Not the best picture I'm afraid but it gives you a good idea.

Supplied in Black GRP ready for painting, includes fitting kit.

If you look at the belly pan in black unpainted GRP you will see how it fits. The front is held on with two stainless bolts and spacers that fit into the existing plate fitted on the front of the down tubes. The back is held on with two cable ties. Ten minute job to fit and very quick to remove when you need to change the oil.
